

The Local Health Integration Networks (LHINs) were established by the Government of Ontario as community-based organizations to plan, co-ordinate, integrate and fund health care services at the local level. The LHINs work with the Ontario government, local health service providers, community agencies, residents and others to ensure a well coordinated system of health services.

The **Local Health Integration Network Collaborative (LHINC)** is a new initiative formed to strengthen relationships between and among health service providers, associations and the LHINs, and to support system alignment. The purpose of LHINC is to support the LHINs in: fostering engagement of the health service provider community in support of collaborative and successful integration of the health care system; their role as system manager; where appropriate, the consistent implementation of provincial strategy and initiatives; and, the identification and dissemination of best practices.

Project Consultant, LHINC

In this exciting new organization, the Project Consultant will manage multiple projects and other initiatives, undertake research efforts to support project activities (e.g. best practice research, literature review); support the work of committees and other collaborative initiatives. Reporting to the Senior Consultant, you will be accountable for: leading multiple projects or segments of projects; engaging and maintaining effective relations with LHINs, health service providers and other stakeholders; conducting or co-ordinating high quality research; supporting LHINC committees; and, delivering results on multiple project initiatives.

Qualifications: The successful candidate has extensive experience working in the health sector; understands the mandates and roles of LHINs and LHINC in the provincial health system; and has extensive experience building partnerships and working with multiple stakeholders in a variety of settings. Candidates will also have demonstrated experience managing multiple projects; a track record of delivering success on major initiatives; strong communication and interpersonal skills; and a post secondary degree in health administration (or equivalent).

Location: Toronto, Ontario
